Chafing Dish and Urn (Using Sterno Type Heat)

1. Do not use anything but Sterno type fuel in the burner.
2. Never light the burner unit before putting liquid into the water pan. Low flame is sufficient to maintain proper heat.
3. Do not put unit on a hot stove or an open flame.
4. Stainless steel food pans can be used for cooking. They can also be placed in the oven to keep food hot.
5. Chafing dish water pans should be filled with hot water. Check water pan when in use to insure sufficient water is contained at all times. Do not use without water.

Use of Sterno

Pry the lid off of Sterno and set Sterno container into the head cup. Light Sterno and adjust lid of heat cup at approximately 1/2 open.

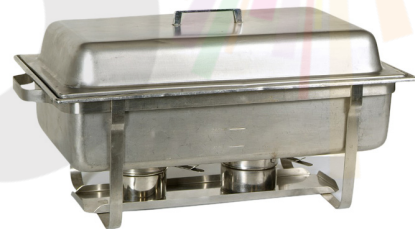

Tip: Always use an underlying tray with items using burners to protect your linen and/or serving surface.
